**Charles and Joseph's Witnesses**

This is an excellent, short documentary on the history and false doctrine of the Watchtower cult, founded by pyramidologist and adulterer Charles Russell. Amongst other things it covers:

-The untruthfulness of the 'Proclaimer's Guide', and Russell's weird doctrines, e.g., that if a man's brain was shaped like a dog's then he would think like one!

-The failed prophecies of 1876, 1914, 1925, WWII, and 1975.

-The 'secret' NWT committee's use of occultist's Johannes Greber's NT translation.

-The committee's absence of scholars (the only 'Greek' scholar was a short order cook, George Gangas!).

The power of this documentary is that eye-witnesses of these events and times are testifying against the organisation that once had them enthralled.

May others also come out of the Watchtower, it's false Jehovah and his archangel Michael/Jesus, and belief in the only Jesus that can save, the mighty God (Is. 9.6; 10.21) who was manifest in the flesh (I Tm 3.16).
