

Dragons and Science

Operational science provides stunning evidence these animals lived only a short time ago, and therefore with humans:

Tyrannosaurus Rex bone from 1990 yielded **preserved** red blood cells, verified by the auto-immune response of an injected rat.⁸

Brachylophosaurus Canadensis fossil found 2007 in Eastern Montana, USA. Labelled **80 Ma**, **preserved** collagen, laminin and elastin proteins were found.⁹

Blind free-thinkers **ignore** the obvious question of fossil ages and simply assume **miraculous** preservations have occurred.

'Deep Time' Dogma

People dismiss the Bible because dragons 'died out ages ago'. 'Living fossils' are a daily witness against this line of thinking:

- **Cyanobacteria**
From the 'Archean Eon', **2500 Ma** old, yet still identical today! Its **information** for using light in creating sugar (photosynthesis) supposedly came from **nowhere**.
- **Coelacanth (*Latimeria Calumnae/Menadoensis*)**
From the 'Devonian Period', it has supposedly been in 'evolutionary stasis' for **400 Ma**.
- **Wollemi tree (*Wollemia Nobilis*)**
These plants arose in the 'Triassic Period' but have been 'frozen in time' for **200 Ma**.
- **Mosquito (*Culicidae*)**
Suspended in amber for **100 Ma**, these insects haven't 'evolved' one bit.

Jesus Christ the Creator *is* the truth you can know today, not from scientific investigation but a guilty and repentant heart. Rejecting God's words under a veil of 'science' is vain, but He predicted many would choose to do so rather than humble themselves:

"For the time will come when they will not endure sound doctrine; but after their own lusts shall they heap up to themselves teachers, having itching ears; And they shall turn away *their* ears from the truth, and shall be turned unto fables." **II Timothy 4.3-4, AV**

Dragons, known in recent times as dinosaurs, were named so by Sir Richard Owen in 1841. Estimates of sub-groups vary and they range in size from Sauropods (e.g. Amphicoelias at ~120 tonnes), down to Microraptors, beasts as small as chickens. These kinds of animals were created on days five (water dwellers and flying creatures) and six (land walkers) of the creation week¹. Outside of the book of Genesis they are mentioned a number of times:

"Behold now **behemoth, which I made with thee**; he eateth grass as an ox. Lo now, his strength *is* in his loins, and his force *is* in the navel of his belly. He moveth his tail like a cedar: the sinews of his stones are wrapped together. **His bones are as strong pieces of brass; his bones are like bars of iron.** He *is* the chief of the ways of God; he that made him can make his sword to approach *unto him*...Behold, he drinketh up a river, and hasteth not; he trusteth that he can draw up Jordan into his mouth."
Job 40.15-19,23 (AV)

"CANST thou draw out **leviathan** with an hook? or his tongue with a cord *which* thou lettest down?...Canst thou fill his skin with barbed irons? or his head with fish spears?...**By his neesings a light doth shine**, and his eyes *are* like the eyelids of the morning...**Out of his nostrils goeth smoke**, as *out* of a seething pot or caldron...The flakes of his flesh are joined together: they are firm in themselves; they cannot be moved...He maketh the deep to boil like a pot; he maketh the sea like a pot of ointment...He beholdeth all high *things*: he *is* a king over all the children of pride."
Job 41.1,7, 18, 20, 23, 31,34 (AV)

Leviathan?

Leviathan's 'fire-breathing' ability may have had a similar design to that of the Bombardier Beetle (*Brachinus Crepitans*). By controlling a mixture of volatile chemicals it shoots out a boiling-hot gas mixture, and from a revolving gun turret!²

Contrary to popular opinion, the Bible clearly describes dragons, telling us they lived on the earth **with** humans. The religion of evolution has them alive for 165 Ma, the last one dying 65 Ma **before** man appeared:

FANTASY	Triassic	Jurassic	Cretaceous	ALERT
	245 mya	208 mya	144 mya	65 mya

¹Genesis 1:20-25, 31, cf. Exodus 20:9-11 (AV)

National Bridges National Monument in Utah, USA contains many petroglyphs by the Native American Indian peoples. Left is one carving at the Kachina Bridge site - a Sauropod dragon.³

Since 1570, in Ica, coastal Peru some **11,000** carved burial stones have been found. **One third** of these depict man and dragon **together**, e.g. Triceratops and Allosaurus.⁴

The Ta Prohm Buddhist Temple was built **1186AD** by King Jayavarman VII in Cambodia.

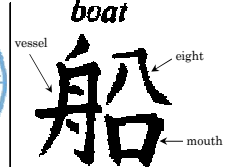

Carved into a corner column at the front entrance are numerous portraits of **animals** (e.g. monkey, deer and swan). Underneath a water buffalo is a **Stegosaurus** image.⁵ Like the buffalo, the Cambodian artisan/s must have **seen** this animal to carve its image into stone. There were no Palaeontologists to reconstruct fossils.

In 1496, Catholic Bishop Richard Bell was entombed at Carlisle Cathedral in the UK. Above is an engraving found on the brass fillet (border strip) of the tomb - **two** intertwined **sauropod** dragons. A dog, bird and pig are also engraved.⁶

The Chinese Zodiac (Shenxiao) assigns one of twelve **real** animals in a twelve year birth cycle. The **dragon** is no less mythical than a horse, rabbit or rat is.

The Chinese character for boat is an excellent description of God's globe-destroying flood which Noah, his 7 family members and all breathing animals, including **dragons** survived to repopulate the earth today.

"And I hated Esau, and laid his mountains and his heritage waste for the dragons of the wilderness." Malachi 1.3, AV
