

## HOSTILE WITNESSES (emphases added)

"Why then is not every geological formation and every stratum full of such intermediate links? Geology assuredly **does not** reveal any such fine graduated organic chain; and this, perhaps, is the most obvious and gravest objection which can be urged against my theory."  
Charles Darwin, "On the Origin of Species", London, John Murray, 1859, p. 125

"Species that were once thought to have turned into others have been found to **overlap** in time with these alleged descendants. In fact, the fossil record does not convincingly document a **single transition** from one species to another."

S. Stanley, "The New Evolutionary Timetable: Fossils, Genes and the Origin of Species", NY, Basic Books, 1981, p. 95

"At the present stage of geological research, we have to admit that there is **nothing** in the geological records that runs contrary to the view of conservative creationists, that God created each species separately, presumably from the dust of the earth."

Dr. E. J. Ambrose, "Nature and Origin of the Biological World", Chichester, John Wiley & Sons, 1982, p. 164

"All these trees of life with their branches of our ancestors, that's a lot of **nonsense**."

Dr. Mary Leakey, Interview, Associated Press, 1996

"Even if **all** the data point to an intelligent designer, such an hypothesis is excluded from science because it is not naturalistic."  
S. C. Todd, correspondence to Nature, Vol.401(6752),1999, p. 423

## DECEIVERS

Ernst Haeckel: Doctored embryo drawings.

Bernard Kettlewell: Faked peppered moth experiment.

Washington Irving: 'Flat Earth' Christian myth.

## SIX-DAY CREATIONISTS

Francis Bacon: Philosopher (d.1626)

Blaise Pascal: Physicist (d.1662)

Johannes Kepler: Astronomer (d.1630)

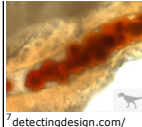

Isaac Newton: Physicist (d.1727)

Galileo Galilei: Astronomer (d.1642)

Louis Pasteur: Biologist (d.1895)

## DINO BONES

In 1990, then Ph.D Biology student Mary Schweitzer found collagen inside an unmineralised T. Rex bone. It was meant to be **65 million** years old! In 2002, another T. Rex bone contained soft tissue! Blood and bone proteins last thousands of years at best.

### Evolution

**Dictionary:** "the continuous genetic adaptation of organisms or species to the environment by the integrating agencies of selection, hybridisation, inbreeding, and mutation."<sup>†</sup>

**Evolutionist:** "all living forms in the world have arisen from a single source which itself came from an inorganic form. The theory can be called the '**General Theory of Evolution**'."<sup>†</sup>

**Layperson:** Billions of years ago life arose in a pond by lighting strikes, turning into everything alive today.

### Natural Selection

**Dictionary:** "the elimination of the unfit and the survival of the fit in the struggle for existence, resulting in the adaptation of a species to a specific environment."<sup>†</sup>

### Equivocate

**Dictionary:** "to use equivocal or ambiguous expressions, especially in order to mislead."<sup>†</sup>

**Example:** Species change all the time (natural selection), therefore evolution is true.

### Science

**Dictionary:** "the systematic study of humans and their environment based on the deductions and inferences which can be made, and the general laws which can be formulated, from **reproducible** observations and measurements of events and parameters within the universe."<sup>†</sup>

**Philosopher:** "...statements, in order to be ranked as scientific, must be capable of conflicting with possible, or conceivable, observations."<sup>2</sup>

**Layperson:** What somebody in a white coat with letters after their name does.

Looking closely, evolution as defined is outside of science making it a philosophy. Unless you own a time machine it is **irrefutable**. Followers have blind faith in a pretend science.

<b>Real science is:</b> 1) Observation 2) Induction 3) Hypothesis 4) Experimentation 5) Conclusion	<b>Real science follows process.</b> Though puffed up, evolution stops at 3).	<b>Real science advances society:</b> Math → Computer Physics → MRI Chemistry → DNA
