

Review: Dr Bruce Fife, *Plandemic: Exposing the Greed, Corruption, and Fraud Behind the COVID-19 Pandemic*, Piccadilly Books, Ltd., Colorado Springs, CO, Nov 2020

Pages: 123

The Plandemic the World Wants to Forget

Even for those who reject Germ Theory and the existence of SARS-CoV-2 ‘virus’, this is an early an excellent summary of the Plandemic, detailing both the lack of danger in infection fatality rates and co-morbidities, and the political campaign to market ‘vaccines’ at any cost.

A level-headed analysis shows the futility of trying to ‘flatten the curve’, and the diabolical tactics of repressing known treatments like hydroxychloroquine and zinc, while at the same time promoting ineffective and deadly ones like Remdesivir.

Required reading to avoid the next ‘pandemic’.

I) The Outbreak (pp. 1-12)

The new ‘virus’ was announced 12/31/2019; within a month 10K cases were reported across 21 countries.

In the 2017-18 Flu season, the CDC estimated 61K deaths.

“If we could not develop immunity, vaccines would be useless.”

“Viruses are constantly around us. Nowhere are we totally free form exposure.”

By September 2020, ‘COVID-19’ had killed 180K.

The CDC estimated only 6% of ‘COVID’ deaths were caused by the disease.

II) A Plandemic (pp. 13-17)

“Flattening the curve” simply means extend or slow down infections, but it will never stop one one as the **ultimate** risk of dying is identical.

III) The Origin of COVID-19 (pp. 18-23)

SARS 2002 occurred when a coronavirus (CoV) jumped from bats to palm civets (a cat-like creature) consumed and sold in Chinese markets.

On 1/1/2020, the Hunan market was shut. Nine days later, an old man suffering chronic liver disease and an abdominal tumour died of a raging fever.

On 3/11/2020, the WHO officially declared a pandemic.

Initial Infection Fatality Rates (IFR) were as high as 9.5%.

By March 2020, 1.7B were in lockdown.

IV) The Coronavirus (pp. 24-36)

The four human CoVs (HCoV) are HCoV-NL63, HCoV-229E, HCoV-OC43, and HCoV-HKU1.

Since 2002, SARS-CoV, SARS-CoV-2, and MERS-CoV have arisen.

MERS arose 2012 in Saudi Arabia, spread to 27 countries, infecting 2,260 and killing 803 (35.5% IFR).

COVID-19 IFR was revised down to 0.05-0.1%.

CoVs are said to originate in horseshoe bats, of which there are 200 spp.

“MERS, which is also know as the camel flu, is believed to have been spread from bats to humans by infected camels in the Middle East, where people are often in close contact ... and also eat and drink their meat and milk.” [p27]

Scientists in biolabs use a flow hood to filter out any escaping microorganisms.

The Wuhan Institute of Virology is only nine miles from the Hunan market.

V) Fear and Panic (pp. 37-46)

People were divided into “essential” and “non-essential” classes.

“Prof Isaac Ben-Israel: “the spread of the coronavirus declines to almost zero after 70 days – no matter ... what measures governments impose to try to thwart it.” [p44]

VI) Are Drugs and Vaccines the Answer? (pp. 47-64)

Dr Vladimir Zelenko’s protocol of ~100% efficacy was hydroxychloroquine (HCQ), azithromycin (for secondary infections), and ZnSO₄.

On 3/16/2020 Moderna began the first COVID vaccine trial after just six weeks’ development on 45 healthy adults 18-55; 3 had a serious AEFI, and 37 showed no benefit.

In April 2020, a RDBPC Remdesivir study of 237 found no benefit in the drug. It does cause liver and kidney damage.

Under the Pandemic and All Hazards Preparedness Act 2006, pharma has nil liability for any biologics manufactured in response to a declared public health emergency.

VII) Who Is Behind the Pandemic? (pp. 65-77)

While HCQ costs ~\$20 for a complete treatment, Remdesivir is \$529 per dose and needs six over five days. At each lodge one tracing board is displayed for each of the three degrees.

VIII) How Dangerous Is COVID-19? (pp. 78-88)

In Padua, 3/6/2020, 3,300 residents of Vò were tested for COVID-19 and 2.7% returned positive.

“I now regarded ... British Masonry ... as the white witch in a dark world.”

IX) A Misinformation Campaign (pp. 89-99)

X) Plandemic Master Plan (pp. 99-105)

1. Control Government authorities.
2. Release the virus in a country to maximise spread.
3. Promote the outbreak as a natural event.
4. Declare a global pandemic.
5. Exaggerate the danger.
6. Censor all dissenting voices.
7. Discredit any alternative treatments.
8. Declare vaccines as the only solution.
9. Enact lockdowns and social distancing.
10. Inflate ‘case’ numbers.
11. Reap the rewards of insider trading and wealth transfer.
